

JP04214709

ANSWER 1 OF 2 CAPLUS:

ACCESSION NUMBER: 1993:60295 CAPLUS
 DOCUMENT NUMBER: 118:60295
 TITLE: Radiation-resistant ethylene-propylene copolymers and their compositions
 INVENTOR(S): Asanuma, Tadashi
 PATENT ASSIGNEE(S): Mitsui Toatsu Chemicals, Inc., Japan
 SOURCE: Jpn. Kokai Tokkyo Koho, 4 pp.
 CODEN: JKXXAF
 DOCUMENT TYPE: Patent
 LANGUAGE: Japanese
 FAMILY ACC. NUM. COUNT: 1
 PATENT INFORMATION:

AB The title copolymers, when based on a polymer chain of 6 monomers, have the continuous C3H6 racemic diad and triad ratio (R) ≥ 0.5 . The copolymers are useful for radiation-sterilizable food and drug packaging materials (no data). Thus, the isopropyl(cyclopentadienyl-1-fluorenyl)zirconium dichloride/Me aluminoxane-catalyzed polymn. of C3H6 and C2H4 prepd. a copolymer having R 0.9, and intrinsic viscosity (in Tetralin at 135°) 1.30, and 1,2,4-trichlorobenzene-solvent derived polydispersity 2.2; and showing good γ -ray radiation resistance, vs. poor for a com. isotactic copolymer having R 0.05 and polydispersity 5.8.

ANSWER 2 OF 2 WPIX:

ACCESSION NUMBER: 1992-311092 [38] WPIX
 DOC. NO. CPI: C1992-138144
 TITLE: Radioactive ray resistant ethylene -propylene copolymer - produced in presence of transition metal cpds. and aluminoxane(s) for good physical properties.
 DERWENT CLASS: A17
 PATENT ASSIGNEE(S): (MITK) MITSUI TOATSU CHEM INC
 COUNTRY COUNT: 1

AN 1992-311092 [38] WPIX

AB JP 04214709 A UPAB: 19931006

The propylene-ethylene copolymer has two or three propylene-continuous racemic ratio in 6 monomer units of a polymer chain of at least 0.5.

Pref. copolymer has a limiting viscosity determined at 135 deg.C in tetralin soln. of at least 0.10 and contains 0.01-50 mole % of ethylene.

The copolymer is produced in the presence of transition metal cpds. and aluminoxanes at -100 to 100 deg.C under ordinary pressure to 50 kg/cm².

Pref. the compsns. contain P or amine type antioxidants. The copolymer has a ratio of wt. average mol. wt/number average mol.wt. (Mw/Mn) being 1.5-5n (1.5-4). The compsns. may contain isotactic polypropylene (IPP), IPP-other olefin copolymers, ethylene-at least 3 C alpha-olefin copolymers.

ADVANTAGE - The copolymer and its compsns. (claimed) have good radioactive ray-resistance and physical properties in good balance.
